The Department of Chemistry at Princeton University invites applications for a tenure-track position in the area of synthetic organic chemistry. The successful candidate will be expected to develop a strong, externally funded research program in an area of synthetic organic chemistry. The candidate will also be expected to excel in teaching undergraduate and graduate students in both general and specialized courses.

Preferred Qualifications:
- A Ph.D. in chemistry or a related field
- A record of high-quality research
- A strong commitment to teaching at the undergraduate and graduate levels
- Demonstrated ability to work effectively with students from diverse backgrounds

To apply, please submit a cover letter, curriculum vitae, statement of research interests, statement of teaching philosophy, and three letters of recommendation. Applicants should have a strong track record of high-quality research and a commitment to excellence in teaching.

The search is open to all areas of chemistry, including synthetic organic, inorganic, materials, and physical chemistry. The position is available for appointment in the fall of 2023. Applications received by January 1, 2023, will be given full consideration.

The Department of Chemistry at Princeton University is committed to diversity and inclusion in all areas of our work. We strongly encourage applications from women and members of underrepresented groups in the field of chemistry.

We will conduct background checks as part of the hiring process. Applicants are asked to provide consent to such checks as well as other appropriate background information either at the time of or upon request. Background checks will include, but are not limited to, checking references and verifications of education or experience, criminal history, motor vehicle and drug testing, and a credit check if applicable to the position. Information obtained from these background checks will be used in a confidential manner consistent with applicable laws.
